Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 16-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Hooper (Patent # 6,757,747).

Regarding claims 16 and 18, Hooper teaches a method caller (routine, col. 2, line 5)

A proxy object method caller coupled to method caller (Proxy object with routine, col. 2, lines 5-10)

A name returning method caller coupled to said proxy object method caller (context information installation identifier. Col. 2, lines 5-15)

Art Unit: 2176

Regarding claim 17, Hooper teaches an entry accessor coupled to name returning method caller (See col. 2, lines 8-10, administrator username/password details)

***Allowable Subject Matter***

3. Claims 1-15, 19-36 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The cited prior art fails to teach the claimed invention alone or in combination. The claimed invention is a method for accessing a relational database from within an object-oriented language program comprising calling a method returning a proxy object representing table in the relational database. Calling a method on the proxy object returned corresponding to categories of data within a table and returning column proxy object and calling another method on column proxy object to return column name. The cited prior art, Specifically Hooper in general teaches a routing calling procedure returning a proxy object, which in turn returns context information including node identification, location, installation identifier etc. However Hooper and all cited prior art fails to teach column proxy object returned by calling on proxy object as claimed. In short a proxy object referencing column proxy object, which in turn references to column name is not taught. Therefore the claimed invention is allowable over the cited prior art.
